Eighth-graders explore careers of the future

The archive cover says 03/2018 and names an unrelated code-verification article. The supplied article is about HighScore 4 U and describes events at the end of June. The actual publisher release month is not verified. This translation follows the supplied article, not the incorrect archive title. Historical company information is retained. Original publisher artwork, logos and advertisements are retained in their original language.

“HighScore 4 U” project

Eighth-graders explore careers of the future

At the end of June, class 8c of Kreisrealschule Gelnhausen took part in three exciting and stimulating project days at CRETEC GmbH's innovation and training centre in Büdingen as part of “HighScore 4 U”. The project is the result of cooperation between the Verein für sozialpädagogisches Management (VSPM e.V.) and CRETEC GmbH, an education provider in the Main-Kinzig district actively involved in school social work.

The young people were shown perspectives for their career choices and gained insights into future careers in Industry 4.0. CRETEC explained training opportunities for application technicians in industrial machine vision, neural networks and robotics. At CRETEC's training centre, practical applications, interesting presentations and discussion sessions gave the 28 pupils a good overview of career fields in Industry 4.0. Alongside machine vision, ID-code processing and robotics, they explored how humans and robots already work together today, how intelligent computers have become and what the future of human-robot collaboration might

look like. Their conclusion: the new careers are not only very well paid, but also a lot of fun!

About CRETEC

CRETEC GmbH is a new company focused on industry's need for solutions that put the fourth industrial revolution into practice. The company's roots go back 28 years to a decade when the printing and media sector made a technological leap forward. CRETEC employs around 18 people at three locations.
